

I firmly believe that closed captioning/open captioning should be required for all movies to be shown at theaters. With the ADA, we have opened up accessibility to wheelchairs, it is time to do something for the Deaf and Hearing-Impaired. I am a hearing person, and I think it is a shame that the Deaf does not have the liberty to see movies at theaters. This should be required on all movies, at all theaters, and during all showings. We have got to do something about this.
